Accessibility

If you have difficulty accessing content, have difficulty viewing a file on the website, or notice any accessibility problems, please contact us to specify the nature of the accessibility issue and the assistive technology you use. We will strive to provide the content you need in the format you require. We welcome your suggestions and comments about improving ongoing efforts to increase the accessibility of this website.

Web Accessibility Help

There are actions you can take to adjust your web browser to make your web experience more accessible.

I am blind or can't see very well

- [Use the keyboard to navigate screens](#) (link is external)
- [Increase text size](#) (link is external)
- [Magnify your screen](#) (link is external)
- [Change background and text colors](#) (link is external)
- [Make your mouse pointer more visible](#) (link is external) (Windows only)

I find a keyboard or mouse hard to use

If you find a keyboard or mouse difficult to use, speech recognition software such as [Dragon NaturallySpeaking](#) (link is external) may help you navigate web pages and online services. This software allows the user to move focus around a web page or application screen through voice controls.

I am deaf or hard of hearing

If you are deaf or hard of hearing, there are several accessibility features available to you.

Transcripts

A text transcript is a text equivalent of audio information that includes spoken words and non-spoken sounds such as sound effects. The Daytona Beach Area Association of REALTORS may be able to provide transcripts of scripted video and audio content that we own on our site.

Captioning

A caption is a transcript for the audio track of a video presentation that is synchronized with the video and audio tracks. Captions are generally rendered visually by being superimposed over the video, which benefits people who are deaf and hard-of-hearing, and anyone who cannot hear the audio (e.g., when in a crowded room). When possible, we will provide captioning for video content under our control.

Volume controls

Your computer, tablet, or mobile device has volume control features. Each video and audio service has its own additional volume controls. Try adjusting both your device's volume controls and your media players' volume controls to optimize your listening experience.
